Retrofit your Mydata Tools

- Tool bodies sent to us for retrofit are fitted for the custom slider retrofit.
- Once the slider become damaged with it normal use, it is replaced in a matter of minutes, and the Tool body is reutilized.
- This feature allows you to:
 - replace the damaged slider at a fraction of the cost of a new spring loaded Tool
 - execute the maintenace and cleaning of the tubes with minimal machine downtime.
 - give you flexibility, because once you have the Tools retrofitted, various sliders are interchangeable within the same Tool body.

Tool Retrofit with spare Slider

All but the Glue Tools and the Big Size Tools comes with an extra slider for two effective lives. So in each retrofit you initially buy, is like buying two Tools from the OEM for less the price of one.

Once you had used the retrofitted slider and the spare slider, you only has to purchase a separate slider at a fraction of the cost and the Tool Body is reused. Only a spare slider is needed.
